Tight Bend Triple-shielding Flexible Cable--MB Series, up to 50GHz

RF ONE Model	Huber Suhner	
MB200	Microbend	<p>MB series from RF ONE excel in their bendability from connector end, resulting from its unique cable structure and connector design. As alternatives to Minibend cables, MB series feature superior mechanical phase stability and robustness, operating max to 50 GHz.</p>
MB250	Minibend Astrolab 32081

Ultra-Flexible Low Loss Cable--UF Series, up to 50GHz

RF ONE Model	Huber Suhner	
UF370P	SUCOFLEX 550E	<p>UF series from RF ONE features multi-stranded center conductor, available in PUR or PTFE jacket which make it highly flexible and ideal to use where frequent flexing is required and phase stability,low loss are uncompromised.</p>
UF520	SUCOFLEX 126E	
UF550	SUCOFLEX 126	

Semi-Rigid Cable-- SG Series, up to 67GHz
