REACH Compliance Declaration Letter

In an effort to address the requirements of the REACH regulation and ensure a reliable ongoing supply of RF ONE parts, we are constantly monitoring the substances of very high concern (SVHCs), as defined by REACH, in our products.

We confirm that the **RF Coaxial Attenuators&Terminations, Cable Assemblies, RF Connectors&Adapters, Waveguide Components and other parts** that were shipped and will be shipped were not and will not be treated with substances containing hexavalent chromium. All of our products do not include hexavalent chromium in the chemical conversion coating process.

Under the structure of the REACH regulation, RF ONE is a supplier of “ARTICLES” to our customers (according to ECHA’s guidance for articles, the electronic components shall be considered as articles). We do not manufacture “substances” or “preparations” and our articles do not involve the “intentional release of substances”. Accordingly, we foresee no registration or pre-registration Authorization requirement for the products we supplied.

We hereby certify that products offered by RF ONE [are in compliance with the last revision of the latest SVHC-241 candidate list \(released on 27-June-2024\) concerning the Registration, Evaluation, Authorization and Restriction of Chemicals \(REACH\)](#) .

We further declare that all the statements in this letter are true and accurate.

If you have questions regarding RF ONE’s REACH position, please contact us via the following email address:sales@rfone.cn. Thank you!
